

A V A N T E

# COMPANY OVERVIEW

From families to small businesses to Fortune Global 500 companies, Avante has provided in-depth expertise in providing enhanced security offerings that are unmatched in the industry.

# BEYOND EXPECTATIONS

Avante Security Inc. (Avante) is the operating subsidiary of Avante Logixx Inc., a publicly listed company on the TSX.V (SYM: XX). Avante has been a trusted partner in advising clients about potential security risks and the solutions that can be implemented to mitigate them for over 16 years.

From families to small businesses to Fortune Global 500 companies, Avante has provided in-depth expertise in providing enhanced security offerings that are unmatched in the industry. By comprehensively analyzing risk, and implementing customized security solutions, Avante Security can create an effective solution specified for each client.

Avante has built its reputation as a pre-eminent security company by providing comprehensive security services through the use of advanced technology, and a focus on client care. Our services include providing strategic security-related consulting, protecting families and high profile individuals as well as corporations, protecting property, managing access control, executive protection and security concierge services. The company also prides itself on providing secure transportation for individuals within Canada and in over 50 higher-risk countries globally, as they travel for business purposes. This unmatched level of service combined with innovative offerings, such as our Corporate 911 24/7 Emergency Crisis Management service, allow corporations to ensure they are exercising an appropriate duty of care to protect their most valuable assets – their employees.

Avante recognized that in order to become a security industry leader, advanced technology was required to facilitate faster and more reliable communication. We established our own research and development group that invented innovative security-related technology, such as the 724Interactive Communicator and the smartboxx. The use of this technology in the security industry, allowed for secure and real time delivery of distress and alarm signals directly to Avante's 24/7 control centre, as well as our Rapid Alarm Response Team, from virtually any hardware platform.

The result of the aforementioned innovation focus is industry-leading offerings. For example, our residential Rapid Alarm Response offering ensures that our operatives arrive in an unrivaled six minutes or less (on average), from the moment an alarm is triggered. Another example of Avante's best in class offerings is its Intelligent Perimeter Protection. This offering makes use of advanced video analytics software combined with real time monitoring from our 24/7 control centre to prevent break-ins and property crime before the perpetrator has a chance to act.

Avante Security has built a reputation for providing best-in-class security offerings, unrivaled client service, and advanced security technology to consistently exceed our clients' expectations.
